OFFICE OF PETITIONS

Application No. 10/024,808
Filed: 19 December 2001

I hereby state:

(i). I am the agent currently responsible for United States Patent Application No. 10/024,808, for which a non-final rejection dated 26 November 2003 was received.

ii). In response to the above referenced non-final rejection, it was my intention to file a Petition to Accept Unintentional Delayed Claim for Priority under 35 U.S.C. 119(e) and a continuation application during the pendency of United States Patent Application No. 10/024,808 and to continue prosecution of the invention in the continuation application. It was not my intention to abandon United States Patent Application No. 10/024,808 unless and until co-pendency was established with the continuation application. To effect the continuation application I filed the following documents:

a) A three month extension of time in United States Patent Application No. 10/024,808 was filed on 26 May 2004, under a separate cover using a certificate of mailing.

b) A continuation application claiming priority through United States Patent Application 10/024,808 was signed for EXPRESS MAIL depositing on Wednesday, May 26, 2004. A return post card was included with the continuation application. A copy of the transmittal form, with the EXPRESS MAIL CERTIFICATE signed on 26 May 2004, is enclosed herewith. Also enclosed herewith is a copy of the returned post card indicating the application number and filing date of the continuation application.

(iii). On or about 10 June 2004 the return post card was received and indicated that the continuation application was assigned Application Number 10/857,407 and afforded a filing date of 28 May 2004. Administrative personnel realized the discrepancy in the date the application was signed (26 May 2004) and the date afforded the application (28 May 2004). Further investigation revealed that the EXPRESS MAIL package containing the continuation application was not deposited with the United States Post Office until 28 May 2004, thereby jeopardizing its claim to priority to United States Patent Application 10/024,808.

(iv). In order to preserve the claim to priority of the continuation application to United States Patent Application No. 10/024,808, applicants petition that United States Patent Application No. 10/024,808 be revived in order to establish co-pendency with continuation application No. 10/857,407.
